

GOURAHARI SAHOO

codegoura+cv@gmail.com |

Hello! I'm Gourahari Sahoo, a BCA 1st year student at Rajdhani College. I have a keen interest in software development, Ethical hacking, cyber security, particularly in web and mobile applications. My journey in technology has been driven by a passion for problem-solving and innovation.

GitHub : <https://github.com/codegoura>

You can explore my projects and contributions on GitHub: github.com/codegoura.

My repository includes various projects that showcase my skills in different programming languages and frameworks.

WEB DEVELOPMENT >>>

Currency converter app:

This is a simple web-based Currency Converter app built using HTML, CSS, and JavaScript using APIS. The app allows users to convert between different currencies based on real-time exchange rates.

Link: https://github.com/CodeGoura/Currency_Converter_App

Rock- paper-scissor Game:

A simple implementation of the classic Rock, Paper, Scissors game using HTML, CSS, and JavaScript.

Link : <https://github.com/CodeGoura/Rock-Paper-Scissors>

Tic-tac-toe Game:

This is a simple implementation of the classic Tic Tac Toe game using HTML, CSS, and JavaScript. It allows two players to take turns marking spaces on a 3x3 grid, aiming to achieve a row, column, or diagonal with their respective marker (X or O).

Link : https://github.com/CodeGoura/Tic_tac_toe_game

Color-palate-Generator:

This repo contain HTML file that having css and js to create color palette and rgb value

Link: https://github.com/CodeGoura/Colour_Palette_Generator

Task-management-site:

Effortlessly manage tasks with this JavaScript Todo App! Add, edit, and mark tasks complete with clean code and intuitive design. Perfect for beginners and pros alike.

Link: https://github.com/CodeGoura/todo_list

APP DEVELOPMENT >>>

➤ Calculator App:

This is a simple and interactive calculator app built using Flutter. The app provides basic arithmetic operations and a user-friendly interface. It is a great example of Flutter's capabilities for creating responsive and attractive UIs.

Link: https://github.com/CodeGoura/todo_list

➤ Task Management App:

Built with Flutter, this app offers real-time notifications and cloud storage, ensuring efficient task management across devices.

➤ Music player App:

Currently working with this music player app, that offers local storage real-time song playing and using APIs playing other online music's able to run cross devices.

CYBERSECURITY AND ETHICAL HACKING >>>

➤ Penetration Testing:

Security Testing to identify vulnerabilities in web applications, using tools like Metasploit, etc. continue... Chrome, etc.

➤ Network Security:

network security measures to protect against cyber threats, and explored techniques for secure data transmission. Making an Wi-fi Password capture device using a ESP8266 micro-controller, currently getting prepare for a signal jammer and RFID signal key copier. I find the **Hero Vida electric scooters**, such as the Vida VI, use RFID (Radio-Frequency Identification) keys for unlocking, and key signals are copied used some IoT and microcontroller

➤ Ethical Hacking Workshops:

Participated in workshops to enhance skills in ethical hacking and learn about the latest developments in cybersecurity.

➤ Capture the Flag (CTF) Events:

Joined vulnerability finding camps hosted by **Google** to sharpen my skills in ethical hacking.

IOT AND SMART DEVICES >>>

➤ High Temperature Alaram:

This is your one-stop resource for implementing a simple effective temperature monitoring and alert system using an Arduino microcontroller.

Link: https://github.com/CodeGoura/Temperature_Sensor_buz.git

➤ Humidity Alaram:

IoT project for building a humidity sensor alarm system using Python, IoT devices, and cloud services The project aims to monitor humidity levels in a specific environment and trigger alarms or notifications when the humidity exceeds or falls below predefined thresholds. It leverages IoT devices, cloud platforms, and automation to provide real-time monitoring and alerts for humidity-related issues. Link:

https://github.com/CodeGoura/Temperature_Sensor_buz.git

➤ **Radar System:**

A simple and functional radar system using Arduino Uno R3, an ultrasonic sensor, and a servo motor. This project visualizes detected objects on a 2D plane by scanning the environment and displaying the output using processing software.

Link: https://github.com/CodeGoura/radar_system.git

GOALS AND ASPIRATIONS

I aim to leverage my technical skills to solve real-world problems and contribute to the tech community through innovative projects and open-source contributions.

SKILLS:

Programming Languages

Processing
C
C++
Python
Embedded C

Web Development

HTML/CSS/JavaScript
React

Data Visualization and BI Tools

Power BI

Development Frameworks

Flutter
Node.js (JavaScript)
HTML Frameworks:
Tailwind CSS

CERTIFICATE OF BRILLIANCE

Eduonix Learning Solutions recognizes the
hard-work and dedication of

Gourahari Sahoo

for successfully completing the

"Be A White Hat Hacker and Pen Tester"

on May 14, 2021. Eduonix congratulates you

for your accomplishment.

Sushant Das
